## GMA's trusted Cabinet member chosen despite opposition

By G. Calabang

PRESIDENT-SELECT BENIGNO NOY DIOSANA III is looking to the rise of President Macapagal-Arroyo's most trusted and longest-serving Cabinet member, Foreign Secretary Alberto Romulo, despite opposition from a line to Arroyo's coalition.

Romulo, who was once an enemy of the Arroyo and Macapagal-Arroyo, is now a close ally of the president. He is also a close ally of the president's son, Benigno III.

The Arroyo family is a powerful force in the country. The Arroyo family is a powerful force in the country. The Arroyo family is a powerful force in the country.

## Massacre witness case gets murkier

By David H. Johnson, Staff Writer

**CHICAGO (UPI)—**WHILE GOVERNMENT AND private prosecutors lay up their increasingly tenuous case to blame for the killing last week of a captured assassin in the downtown restaurant, police investigators said the killing may not have been related to the case at all.

During the massacre, the captured assassin, James Earl Ray, was shot several times in the chest and head by police officers in the restaurant.

The police report said a witness, a man who was shot in the chest, was killed by police officers in the restaurant.

General, or broad-based, levels of agreement between all members and stakeholders, from the mid-1990s to 2000, led to increased support for and adoption of the program. In contrast, the fragmented and inconsistent level of agreement, such as opposing learning, information, and technical assistance and organizational support, led to a weaker commitment to the program among agencies, resulting in a slower start, less buy-in, and a slower pace of implementation. In addition, the fragmented support for the program was also evident in the uneven implementation of the program across the states. For example, the program was implemented in a more comprehensive manner in some states, such as California, than in others, such as Texas. There is no doubt that the *Chlorophyll* is a very important factor in the life of the plant. It is the green pigment that gives plants their color and is essential for photosynthesis. The *Chlorophyll* is found in the chloroplasts of plant cells. It is a complex molecule that contains a central magnesium atom surrounded by four nitrogen atoms. The *Chlorophyll* is responsible for capturing light energy and converting it into chemical energy through the process of photosynthesis. Without *Chlorophyll*, plants would not be able to produce their own food and would eventually die.

# Abuse cases loosen bishops' culture of silence in Italy

ROME (AP) — The Italian Catholic Church is facing a new wave of scrutiny as a series of high-profile abuse cases have shaken the hierarchy. The Vatican's silence, once a defining feature of its response to such allegations, is now being challenged by a growing number of bishops and clergy members who are speaking out. The cases involve allegations of sexual abuse by priests and bishops, and the Church's handling of these cases. The Vatican has been accused of covering up the abuse and protecting the interests of the Church over the victims. The new wave of scrutiny is being fueled by a series of high-profile cases, including the case of a bishop who was accused of sexual abuse and the case of a priest who was accused of sexual abuse.
